

LOFT SPOTLIGHT

QUANTUM SAILS ANNAPOLIS

ABOUT THE LOFT

Situated conveniently in the Sailing Capital of the United States, the Quantum Sails Annapolis loft supports racers and cruisers up and down the East Coast. The breadth of knowledge at our Annapolis loft is thanks to our full team of Sailmakers, Designers, Sail Consultants, and Client Care Representatives, all working together under one roof. We offer a range of sail care and repair services – from simple repairs to precision sail re-cuts. We also have a full-service canvas department for crafting sail covers, biminis and dodgers, as well as other custom projects.

Our new facility in the heart of Eastport opened in 2021 and is a large and inviting space that is not only used for our operational activities but also for regatta receptions, community sailing events, classes and more. From sponsoring local weeknight PHRF racing to youth sailing chalk talks on rainy camp days, the new loft is a pillar of the Annapolis sailing community.

MEET THE TEAM

QUANTUM SAILS ANNAPOLIS

JASON CURRIE
*Sail & Design Consultant /
Mid Atlantic Regional Manager*

Currie's pedigree includes not only an impressive trophy case on the Grand Prix stage, but also a wealth of experience in cruising applications. He has been involved in the technical and hands-on side of sailmaking for more than 30 years, having grown up sailing in his native New Zealand.

MIKE CRUMP
Service Manager

Crump has more than 30 years of experience as a sailmaker, with a specific focus on service sailmaking and client care for the past decade. His attention to detail and drive to help clients enjoy more time on the water sets him apart in the industry.

BRIAN DEBRINCAT
Sailmaker

DeBrincat's past roles include sailmaker for New York Yacht Club's American Magic, among many other high-level racing programs. While he specializes in performance sailing, his background makes him an excellent resource for cruisers looking for optimal efficiency from their setup.

DAVID FLYNN
Sail & Design Consultant

Flynn has an exceptional eye for sail shape and a feel for the subtle alterations of trim and tuning. He has been instrumental in developing Quantum tuning guides and systems for many of the leading offshore one design classes. He also specializes in cruising and education, contributing regularly to safety at sea seminars and numerous sailing publications.

BILLY MARTIN
Sail Consultant

From his early days in Optis through his collegiate sailing career and on to the professional world, Martin's well-rounded career and familiarity with many types of boats and roles helps both new and seasoned sailors to reach their goals. His coaching background is an asset for customers who want to fully understand the how's and why's behind their boat's performance.

SCOTT NIXON
*Sail & Design Consultant/
One Design Specialist*

Specializing in One Design Classes, Nixon is directly involved in the testing, design, and development of these sail programs. He ensures that Quantum clients are at the front of the fleet. Nixon has won numerous championships at the world, Gold Cup, European, North American, and national levels.

DOUG STEWART
Sail Designer

Stewart has been a Sailmaker for more than 40 years, having started with Ted Hood in 1981. In that time, he's designed and built sails for America's Cup programs, mega-yachts, and cruisers alike. Clients can expect Stewart to listen first and advise second. His unrivaled level of expertise is an asset to every Quantum client.

ANDREW WATERS
Sail & Design Consultant

Working closely with boatbuilders, Waters has an extensive understanding of the interconnection between design and performance. Logging more than 100,000 offshore miles, Waters is a Quantum customer-turned-expert, employing his first-hand experience to support both racers and cruisers.
